Kevin Mahardhika Mulya

Jakarta, Indonesia • www.linkedin.com/in/kevin-mahardhika-mulya • kevinmahardhika6@gmail.com • 085220965178

Profile

Computer Science student with growing passion in software development, machine learning, deep learning, and computer vision. Experienced in working on collaborative team projects that's involved in planning, development, debugging, and delivery. Breaks complex problems into clear steps and collaborates effectively with teammates. Keeps learning new tools in order to build software people use. Currently seeking an internship to gain industry experience and contribute to real projects.

Education

Binus University — Jakarta, Indonesia
Bachelor of Computer Science. GPA **3.50/4.00** — 2028

Experience

Binus Blockchain and Crypto Club — West Jakarta, DKI Jakarta
People and Culture Member — February 2026 – Present

- Developed comprehensive recruitment modules, technical study cases, and interview assessment for the 2026/2027 BBCC activist intake.
- Produced engaging content and edited promotional videos for Binus Crypto Week

Bina Nusantara Computer Club — West Jakarta, DKI Jakarta
Activist — October 2024 – October 2025

- Built front-end components and core features of BNCC Technoscape Hackathon 2025 using React js.
- Collaborated with the development team to maintain and deliver a responsive website event and ensure a seamless registration pipeline for participants.
- Developed a new strategic work program as part of the BNCC Leadership Training to optimize future organizational operations.

Volunteer Experience & Leadership

Teach For Indonesia — West Jakarta, DKI Jakarta
Volunteer — May 2026 – June 2026

- Designed and delivered creative learning modules for preschoolers to foster and boost their cognitive development in a fun and supportive way

Projects

TaskWeaver: Task Management Web App

- Developed the back end of a full-stack web platform using Express.js, with 50+ REST API endpoints for users, groups, tasks, channels, file uploads and activity tracking.
- Designed a layered architecture (controller, service, repository) on a PostgreSQL database hosted on Supabase.
- Implemented real-time group chat with Socket.IO and file storage with Multer and Supabase Storage.
- Integrated the Gemini API to break large tasks into subtasks and assign them to team members by skill, with workload rebalancing.

DIVA: Laundry Management Web App

- Built an ASP.NET Core Web API (.NET 10) with EF Core and PostgreSQL, exposing endpoints for customers, services, orders, a dashboard and reports.
- Secured the API with Supabase JWT authentication and PostgreSQL row-level security, and managed the schema with EF Core migrations.
- Generated order receipts as downloadable PDFs (QuestPDF) and shareable public links protected by random tokens and rate limiting.
- built 10 pages for login, dashboard, customers, orders, services, reports, settings and a public receipt page, including a 3-step order wizard, live search and a custom SVG revenue chart.

NutriScan: Food Recognition

- Built a food recognition system that detects and classifies food items from images using YOLOv8.
- Designed the end-to-end pipeline from dataset preparation and model training to evaluation

CalorIQ: Food Chatbot with Semantic Search

- Built an NLP chatbot that finds foods through semantic search with SBERT embeddings.
- Added a retrieval-augmented generation (RAG) layer on Groq/Llama so answers are grounded in the retrieved food data.

Skills & Interests

Technical: C, C#, Python, Java, Javascript, HTML/CSS, PostgreSQL, Express.js, Node.js, Scikit-Learn, OpenCV, NLTK, .NET, GitHub
Language: Indonesian, English
Interests: Fullstack Development, Software Engineering, Machine Learning, Deep Learning, Computer Vision, Natural Language Processing.
